An integrated transportation network that is commercially viable, that boosts the movement of locally produced, manufactured best-of-products in the region with initial trade facilitation among The Golden Triangle™ (Caribbean countries need to integrate their economy for development and ability to compete in the world is possible)

## Green Energy -- Alternative Sustainable Energy Solutions for the Caribbean

### Solar Panel

- Facilitating renewable energy from lost electricity, bolstered by green energy funding and the establishment of PPPs within the energy sector
  - On average, 40% of power is lost within 24hrs
- Creating a template to bring solar panel and other technology platform to the region, triggering the stimulation of job growth in 100s within the green technology and energy sectors
- A maritime transportation framework built on a lower-cost, logistical ecosystem and a sustainable energy platform which will support the realisation of increase profitability and strengthening of exports with regards to the movement of goods across the region

### Crypto

The creation of a crypto mining campus to bring a clean solution to the blockchain support system with no impact on the cost of electricity in the region. The diversity on energy source in the region through public private partnership will be a case study for the world.

# SUMMIT FOCUSED GOALS

## Agri-Innovation --The development of an Agribusiness investment platform

### Smart Farming

Providing farmers across the Caribbean with access to Israel's world class experts, its innovations and a support community, to help build momentum for agricultural modernisation to impact the region, expand their expertise and become drivers of positive change.

### Buiding Capacity

- Consolidation of master contracts for the logistics need of the agri-business across regional players
- Boosting agricultural productivity and promoting agriculture as an engine of economic growth
- Development of a billion dollars export business to Europe and the US
- Increase international and cross country trade and distribution of food; entering the premium market for produce

Introduction of smart farming/Israeli technologies to the region

## Waste Management --Providing solution to the Caribbean waste problem

### Waste to Energy

- Helping with the energy independence of the Caribbean
- Impacting the socio-economic environment by bringing investment in low-income areas
- Shaping a trash recycling centric culture
- Creation of jobs and empowering the local community
- Dominican Republic has an example of fuel generation through trash

# SUMMIT FOCUSED GOALS

## Gold and Mining Advisory --Building Mining Capacity

- The possibilities of the Caribbean becoming a major player into the mining commodity market. Aggregate Mining - Silica Case

## Real Estate

- A partner of the development of the retirement communities in the Caribbean
- A partner of the development of diaspora communities in the Caribbean
- Facilitating the process of foreign real estate acquisition
- A devised government in simplifying the process of the real estate acquisition by American

## Infrastructure Development

- Pleion Inc - Space development proposal of the Amazonica Hotel and Georgetown Waterfront
- Highway and road infrastructure with 100% financing
- Training and education programs (United States construction code)

# SUMMIT FOCUSED GOALS

## Solar Plants -- Augmenting green energy solution in the region

- The creation of country-wide solar mega plants with 100% financing minimum 300 megawatts project

- Creation of high skilled, high paying jobs
